## YUKON

Note: The Yukon curriculum is an adaptation of the [British Columbia curriculum](#) with a focus on Yukon content and Yukon First Nations' ways of knowing and doing. Refer to the BC curriculum curricular outcomes for what students will be learning in the Yukon. Please read the following statement regarding the creation of localized Yukon curriculum. "During the 2017/18 school year First Nations Initiatives in collaboration with the Yukon First Nations Curriculum Working Group, Educational Consultants, Yukon First Nations, and Yukon educators worked on localizing Kindergarten to grade 9 of B.C.'s curriculum so that it is specific to Yukon. The majority of the changes provide clarity on the nature of the intended scope of the curriculum and provide additional supports to educators as they embed Yukon First Nations ways of knowing, doing and being into their programming. These may be definitions, explanations, examples or information to provide clarity when required. It is important to note that once an educator is working with the localized Yukon curriculum it's important the curriculum be further localized when they are working in a community. A first draft of the K-9 localized Yukon curriculum will be field tested during the 2020-21 school year where a group of teachers will be able to implement in their classroom programming and provide feedback." – [Yukon First Nations Resources for Teachers 2020/2021](#)

## YUKON FIRST NATIONS RESOURCES FOR TEACHERS

### [Culturally Responsive Educational Practices for Yukon Teachers](#)

#### [What Yukon Educators Need to Know](#)

- The legacy of Residential School and various forms of First Nations educational institutions have resulted in traumatic effects on multiple generations
- The "Sixties Scoop" has compounded the effects of separation of children and families
- Yukon First Nation 'ways of knowing, doing and being' are as diverse and as different as the culture and languages through which the knowledge is passed along
- Infusion of Yukon 'ways of knowing, doing and being' is vital to the process of overcoming the dominance of Eurocentric thought and belief systems within the educational system
- 'Indigenizing the curriculum' by embedding Indigenous content and perspectives into the curricula and teaching practices begins to transform the colonial construction
- Developing culturally safe learning environments benefits students and educators

#### [Residential School Curriculum](#)

- The department is committed to recognizing the history, experiences and impacts of residential schools across Canada and continues to develop resources to educate younger generations about this difficult and complicated chapter of our history. Since 2015 an Indian residential schools' unit has been a mandatory part of Social Studies 10 in Yukon schools.

## GRADE 8/9 CROSS-CURRICULAR UNITS

### #1. [Plants and Connection to Place](#) – Grade 8

#### [Connections to Yukon First Nations Ways of Knowing and Doing](#)

- Yukon First Nations people carry scientific knowledge learned through countless generations of experiences with the land and ecosystems. Valuable lessons have been learned and built upon over the sharing of this knowledge through stories and experiences.

- This unit is a cross-curricular approach designed to help Grade 8 students explore the theme of plants and connection to place. Students will learn about Yukon First Nations, medicinal plants, animal interactions, environmental safety, ethics, and protocols for harvesting in a YFN traditional territory.
- Integrating the core competencies throughout the unit allows students to gain a deeper understanding and appreciation of YFN traditional knowledge systems. Teachers can use this unit to integrate other subjects, to include community expertise, and to strengthen partnerships with their local First Nation. A culturally responsive assessment tool was created as part of this unit.

## #2. Climate Change – Grades 8-9

### [Connections to Yukon First Nations Ways of Knowing and Doing](#)

- Yukon First Nations people have always experienced, and learned to respond to, environmental change. The oral histories passed down for countless generations speak of the responses to such change, especially since the coming of Europeans. The diverse First Nations in Yukon lived closely with the land, through seasonal food gathering and careful observations of the health of the plant and animal species and weather patterns. Central to this relationship has been respect and reverence for the generosity of the land and repercussions of unsustainable harvesting practices.
- There are eight First Nations language groups in Yukon. Embedded in these languages and oral histories is the knowledge of unique technologies and systems for living successfully on the land. Since the time of contact, Yukon First Nations have experienced significant impacts on aspects of the transmission of this traditional knowledge, changes in land-based practices, changing economies, and imposed political structures.

## #3. Interconnectedness – Grade 9

### [Connections to Yukon First Nations Ways of Knowing and Doing](#)

- Yukon First Nations people carry scientific knowledge learned through countless generations of experiences with the land and ecosystems. Valuable lessons have been learned and built upon over the sharing of this knowledge through stories and experiences, ultimately surviving in a sustainable and respectful way.
- Yukon First Nations have survived in their unique traditional territories through their knowledge, which has enabled them to live sustainably using the resources available to them.
- Most Yukon First Nations worldviews include the idea that everything in the universe is related.

Viewing all aspects of the natural world as your relatives demands a respectful and caring approach to use the resources. From Yukon First Nations perspectives, the land is generously providing gifts to humans, and people have the responsibility of reciprocating this generosity.
